Background Papers: None

Implications (tick ✓):

LEGAL			FINANCIAL	
HUMAN RESOURCES			EQUALITY IMPACT	
ENVIRONMENTAL			POLICY	
CORPORATE RISK	Known	✓	OTHER (please specify)	
	New			

Any implications affecting this report are noted at the end of the report.

PURPOSE:

To consider the Service's Corporate Risk Register in relation to Human Resources and Organisational Development.

RECOMMENDATION:

That Members note and approve the review by the Service of the Corporate Risk Register in relation to Human Resources Policy and Challenge Group.

---

1.   Introduction

1.1   Members have requested a standing item to be placed on the Agenda of the Policy and Challenge Groups for the consideration of risks relating to the remit of each Group. In addition, the Fire and Rescue Authority's (FRA) Audit and Standards Committee receives regular reports on the full Corporate Risk Register.

1.2   An extract of the Corporate Risk Register showing the risks appropriate to the Human Resources Policy and Challenge Group together with explanatory notes regarding the risk ratings applied is appended to this report.

2.   Current Revisions

2.1   The register is reviewed on a monthly basis during the Service's Corporate Management Team (CMT) meetings and by CMT members between these meetings if required. A copy of the risks relevant to the Human Resources Policy and Challenge Group are attached for your information and approval.

2.2   Changes to individual risk ratings in the Corporate Risk Register: All risks that are reported to the Human Resources Policy and Challenge Group have been reviewed and there are no risk rating changes to report to Members.

2.3   Updates to individual risks in the Corporate Risk Register:

- **CRR00025: If operational personnel either individually or collectively at any or all levels do not meet the minimum level of competence to safely deal with the full range of incidents which may be encountered, particularly areas of competencies relating to: - Incident Command - Use of Breathing Apparatus - Compartment Fire Behaviour - Water related incidents - High-Rise incidents - Work at Height Then there is the potential to cause significant injury or even deaths to our staff:** Twelve new wholetime firefighters will be undertaking a Skills for Justice accredited Foundation training course in June 2017 to enable them to attend stations in September 2017. Alongside these new firefighters, the Service will also welcome six firefighters on transfer to Bedfordshire following success at a selection process, who bring with them operational experience. All safety critical training performance is now managed through PDRPro and reports for Q3 and Q4 will be developed using this improved process. Any gaps identified in training can be developed into effective reports for line managers to take appropriate action in a timelier manner. A recent Skills for Justice audit into Driver Training proved successful with only two minor recommendations, both of which have been implemented. This audit underpins the work continually taking place to assure our training provision.

GROUP COMMANDER DARREN COOK
HEAD OF PROJECTS, SAFETY AND BUSINESS SUPPORT

Explanatory tables in regard to the risk impact scores, the risk rating and the risk strategy.

Risk Rating

Risk Rating/Colour	Risk Rating Considerations/Action
Very High	High risks which require urgent management attention and action. Where appropriate, practical and proportionate to do so, new risk controls must be implemented as soon as possible, to reduce the risk rating. New controls aim to: • reduce the likelihood of a disruption • shorten the period of a disruption if it occurs • limit the impact of a disruption if it occurs These risks are monitored by CMT risk owner on a regular basis and reviewed quarterly and annually by CMT.
High	These are high risks which require management attention and action. Where practical and proportionate to do so, new risk controls *should* be implemented to reduce the risk rating as the aim above. These risks are monitored by CMT risk owner on a regular basis and reviewed quarterly and annually by CMT.
Moderate	These are moderate risks. New risk controls should be considered and scoped. Where practical and proportionate, selected controls should be prioritised for implementation. These risks are monitored and reviewed by CMT.
Low	These risks are unlikely to occur and are not significant in their impact. They are managed within CMT management framework and reviewed by CMT.

Risk Strategy

Risk Strategy	Description
Treat	Implement and monitor the effectiveness of new controls to reduce the risk rating. This may involve significant resource to achieve (IT infrastructure for data replication/storage, cross-training of specialist staff, providing standby-premises etc) or may comprise a number of low cost, or cost neutral, mitigating measures which cumulatively reduce the risk rating (a validated Business Continuity plan, documented and regularly rehearsed building evacuation procedures etc)
Tolerate	A risk may be acceptable without any further action being taken depending on the risk appetite of the organisation. Also, while there may clearly be additional new controls which could be implemented to 'treat' a risk, if the cost of treating the risk is greater than the anticipated impact and loss should the risk occur, then it may be decided to tolerate the risk maintaining existing risk controls only
Transfer	It may be possible to transfer the risk to a third party (conventional insurance or service provision (outsourcing)), however it is not possible to transfer the responsibility for the risk which remains with BLFRS
Terminate	In some circumstances it may be appropriate or possible to terminate or remove the risk altogether by changing policy, process, procedure or function
